

---

### Deliver a Superior User Experience

- Mitigate performance issues quickly with data-driven insights into network and applications
- Remediate issues by correlating network and application performance with user and device activities
- Track user adoption and usage of applications to make the right business decisions

### Increase Operational Efficiency

- Manage your entire network securely and efficiently from a single pane of glass that integrates automation, visibility and control
- Increase time-to-value with Zero Touch Provisioning (ZTP+)
- Optimize workflows with flexible groupings and filtering for reporting and large-scale editing

### Keep Your Network Secure

- Make real-time decisions based on actionable insights from the network
- Easily enforce policies across the entire infrastructure for QoS and bandwidth
- Reduce the risk of implementing new technologies such as BYOD and IoT

## Top 6 Things You Need to Know: Extreme Management Center™ Suite

### Only Extreme Management Center Gives You a True 360° View Across Your Network

Extreme Management Center provides you with one fully automated platform that gives you actionable insights, deep visibility, granular policy and security and compliance. Enterprises are turning to Extreme Management Center, the only fully integrated solution for optimized operations, fast troubleshooting and network monetization.

Get a sneak peek of Extreme Management Center with this Top 6 List:

## 1 360° View Across Users, Devices, Locations, Apps, and Networks

Other than competitors, we are using one powerful, single database to give you real-time insights across your entire network from the access edge to the datacenter. Extreme Management Center lets you optimize operations and monetize the network.

## 2 FULL Lifecycle Management in One Platform

Starting with design and the intent of the network, all the way to deployment and optimization, we give you the insights and tools for optimization and remediation.

## 3 Deep Application Insights with Thousands of Fingerprints

Extreme Management Center combines flow-based technology with thousands of application fingerprints to detect issues with applications and measure the quality of user experience.

## 4 Integrated With Ecosystem Partners Using a Rich Set of APIs

Extreme Management Center's APIs allow you to integrate with a variety of technology solutions in your environment including MDM vendors and security partners such as Palo Alto Networks, Intel/McAfee, Google and Microsoft for added value.

## 5 Stay Secure and Compliant to Avoid Breaches and Penalties

Information Governance Engine monitors and audits network configurations for industry compliance (PCI, HIPAA, GDPR) and helps you avoid security breaches.

## 6 The Best Service and Support You Can Get

Unlike our competitors, our service and support resources are 100% insourced. We are rated # 1 in service and support by our customers. We are here to ensure your experience with us is outstanding.
